Purchase a stand-alone custom MyMathLab code, ISBN: 9781323835029 or a custom MyMathLab code with the 3-hole punch versions of both Thomas and Lay ISBN: 132383768X/9781323837689 or the 3-hole punch version of Lay only ISBN: 1323901248/9781323901243

Mathematics Textbook Suggestions Fall 2018

If you will be taking:

**Math 2550
Or
Math 2551**

Have you used
MyMathLab at GT
in the past 18 months?

Yes

No

Your old code should still work.
Go to MyMathLab and
select the option to “add a new
course” using your professor's
Course ID, or register directly
through Canvas.
DO NOT PURCHASE A NEW CODE.

Purchase a stand-alone custom
MyMathLab code
ISBN: 1323131760
This code is for Thomas 13th edition
packaged with Lay.
The loose-leaf text and code bundle
will no longer be available
for for this edition.

Important notes regarding the textbooks:

- MyMathLab comes with interactive, electronic versions of both the Thomas and Lay textbooks. Purchasing a hard copy is recommended, but not required.
- You MUST purchase the code for MyMathLab either online while registering at www.mymathlab.com or through the Georgia Tech bookstores. Codes from other vendors (such as Amazon, etc.) WILL NOT WORK!
- The bookstore also offers packages with the Thomas text alone, the Lay text alone, or both texts along with the MyMathLab code.
- In the Fall 2018 term, all 1000-level courses will be upgraded to the 14th edition of Thomas. The 2000-level courses will upgrade in Spring 2019. Temporary access may be used if you have an old code and are waiting to hear from Pearson about transitioning to the new edition.
- Please note: You will need your professor's course ID, or Canvas page, in order to register on-line. Please wait until the first day of class to activate your access code.
- For technical help with MyMathLab, please contact the on-line help desk, found on the links for “help” at www.pearsonmylabandmastering.com .
